1.09 PROVISION FOR WAIVERS AND MODIFICATIONS

Within the general limitations of the Comprehensive Plan, the spirit and intent of the regulations and the public interest, safety and welfare, the Planning Commission may adjust or modify these regulations only when:

- A) The request for modifications has been reviewed by the Technical Review Team and their comments have been forwarded to the Planning Commission for review; and
- B) The waiver or modification is consistent with the stated purpose and intent of these regulations and with the adopted **COMPREHENSIVE PLAN**; and
- C) The modification would not have a significantly adverse impact on the public interest; and

- D) The modification would not overburden or otherwise adversely impact public facilities.
- E) The applicant has clearly showed the existence of **one or more** of the following circumstances:
- 1) Superior Alternatives - Where the proposed waiver/modification will provide an alternative that will achieve the purposes of the requirement through clearly superior design, efficiency, or performance.
 - 2) Protection of Significant Features - Where the waiver/modification is necessary to preserve or enhance significant existing environmental or cultural features, such as trees, scenic areas, historic sites or public facilities, related to the development site.
 - 3) Deprivation of Reasonable Use - Where the strict application of the requirement would effectively deprive the applicant of all reasonable use of the land, due to its unusual size, shape, topography, natural conditions, or location; provided:
 - a) Such effect upon the owner is not outweighed by a valid public purpose in imposing the requirement in a specific case, and
 - b) The unusual conditions involved are not personal to, nor the result of actions of the developer or property owner, which occurred after the effective date of these regulations.
 - 4) Technical Impracticality - Where strict application of the requirement would be technically impractical in terms of engineering, design, or construction practices, due to the unusual size, shape, topography, natural conditions, or location of the land or due to improved efficiency, performance, safety, or construction practices which will be realized by deferral of the installation of required improvements; provided:
 - a) The development will provide an alternative adequate design to achieve the purposes of the requirement, including performance guarantee for the current construction cost, adjusted for inflation, of any required improvements which may be deferred; and
 - b) Any unusual conditions creating the impracticality are not personal to, nor the result of the actions of the developer or property owner that occurred after the effective date of these regulations.
 - 5) No Relationship to the Development or its Impacts - Where all or any part of the requirement has no relationship to the needs of the development, or to the impact of the development on the public facilities, land use, traffic, public safety or environment of the neighborhood and the general community, due to the location, scale, or type of development involved; provided that any specific modification requirements set forth in these regulations are met.

The Planning Commission may make reasonable conditions and additional or alternative requirements, including but not limited to those relating to the provision of adequate security to assure compliance, the dedication or reservation of land, or the provision of funds in lieu of installation of improvements or dedication or reservation of land, may be imposed in connection with the approval of any waiver/modification of any requirements under this zoning ordinance. Furthermore, any adjustments can in no way be made to the basic zone district's permitted uses, bulk, density, and height requirements or to the maximum limits permitted in regard to square footage.
